PROFILE

Data Scientist and AI Engineer working at the intersection of business and modern AI. Over five years at OTTO Group built deep fluency in corporate data flows, financial systems, and cross-functional stakeholder work. Today I orchestrate end-to-end AI solutions across multiple layers — from multi-agent LLM systems and automated news-crawler pipelines to deep-learning models for computer vision. I built and deploy this portfolio on AWS CDK. Comfortable navigating modern AI-assisted development with the latest tools and the legacy enterprise systems many companies still run on. Currently writing my Master's thesis on GraphRAG Document Intelligence as part of my M.Sc. Data Science & AI at FH Wedel, while shipping production code on the side.

EXPERIENCE

AI & Data Science Working Student

2025-06 — 2025-12

Datalogue · Hamburg

20h/week on a B2B Sales Lead project from concept to MVP — reduced manual sales research workload by ~53%.

- Designed multi-agent architecture: LLM agents for company targeting, contact discovery, insight generation, and outreach drafting with human-in-the-loop feedback
- Built generic news-crawler pipeline with PostgreSQL 3NF + vector search; reduced sequential latency ~70× via async fan-out

Junior Entrepreneur / Mentee

2024-11 — 2025-01

Future Founder Program · Hamburg

- Entrepreneurial program with workshops, coaching sessions, and pitch events to develop a startup mindset
- Built an AI-powered regulatory compliance tool for biotech within a team of four, streamlining processes to accelerate life-saving products to market

Trainee Full Stack Java Development

2024-01 — 2024-04

neuefische GmbH · Hamburg

- Intensive full-stack bootcamp: Java (Spring Boot, OOP, MongoDB, OAuth, Docker), TypeScript, and advanced React
- Built and deployed MyRecipes — an AI-powered web app suggesting recipes from available ingredients using Java, REST APIs, MongoDB, and TDD

Trainee Data Science & AI

2022-11 — 2023-02

neuefische GmbH · Hamburg

- Intensive data science bootcamp covering statistics, machine learning, data visualization, and big data analysis
- Capstone project: multi-objective recommender system using Python, SQL, GCP, Word2Vec, and Co-Visitation Matrix

Financial Accountant

2017-04 — 2022-07

OTTO Group · Hamburg

- Led robotics initiatives: automated booking of vacation accruals and interest schedules via UiPath, optimized booking processes and analytical workflows using Excel & SAP
- Independently managed financial accounting for multiple OTTO Group subsidiaries using SAP FI-CO
- Prepared monthly, quarterly & annual financial statements (HGB & IFRS); managed consolidation reporting in SAP BPC; main contact for external auditors

Intern in Group Financial Reporting

2016-11 — 2017-04

OTTO Group · Hamburg

- Supported IFRS implementation, options evaluation & financial statement review; gained knowledge of group consolidation working with consulting firms

EDUCATION

M.Sc. Data Science & Artificial Intelligence2024-04 — Present

FH Wedel, Wedel, Germany

- Thesis in progress: Document Intelligence and Knowledge Graph Construction — OCR-free extraction with modern document VLMs, knowledge graph construction, GraphRAG reasoning with local LLMs, zero cloud dependency
- Deep Learning project: Urban Farming Plant Health — hierarchical 3-stage pipeline across ViT/CNN architectures with Grad-CAM and Attention Rollout explainability
- Coursework: Deep Learning, Computer Vision, Machine Learning, Symbolic AI, Econometrics, Empirical Research Methods, Category Management, E-Commerce Business Models, Digital Transformation, Strategic Management, Agile PM & Change Management, Data Engineering, Unix & Shell Programming

Professional Course Financial Accounting (Bilanzbuchhalter)2018 — 2020

GFS Steuerfachschule

B.Sc. Business Administration, Financial Management & Banking2009 — 2013

Yarmouk Private University, Damascus, Syria

- Thesis: Testing the Capital Asset Pricing Model (CAPM) in the Syrian Stock Market

TECHNICAL SKILLS

Programming Languages

Python TypeScript JavaScript Java SQL VBA HTML CSS

AI / Machine Learning

LLM Agents Multi-Agent Orchestration RAG

Prompt Engineering Context Engineering Function Calling Structured Outputs Local Inference (llama.cpp) LLM APIs

Vision Transformers CNNs YOLO Grad-CAM Attention Rollout Word2Vec Embeddings XGBoost / LightGBM EDA

Regression Time Series Statistical Modeling

Frameworks & Libraries

PyTorch TensorFlow Hugging Face timm scikit-learn OpenCV LangChain Agno AutoGen Next.js React

FastAPI Streamlit Spring Boot Pydantic SQLAlchemy BeautifulSoup Tailwind CSS MDX Pandas Polars

NumPy Plotly Matplotlib Seaborn

Cloud & DevOps

AWS (CDK, Lambda, S3, CloudFront) GCP Docker GitHub Actions Render MLflow Makefile Playwright

Databases

PostgreSQL (3NF) MongoDB Vector DB (FAISS, Pinecone) SAP FI-CO / BPC

Tools

Git Jupyter UiPath (RPA) Oxylabs Sanity CMS Stripe

KEY STRENGTHS

- Translates business problems into AI-powered products
 - Strategic, entrepreneurial, creative - innovation driven
 - Bridges AI, business logic, and infrastructure
 - Rapid AI-assisted development with the latest tools
- Strong business understanding
 - End-to-end ownership- ideation & product management
 - Fluent in both modern AI and legacy enterprise systems
 - Communicative, collaborative, & calm under pressure

LANGUAGES

German C2 · English Full professional · Arabic Native · Spanish toward B1 · French Elementary

HOBBIES & INTERESTS

Music Lover:

Guitar | Dabbles in piano when life allows

Pushing Limits:

Marathon runner | Boulderling | Swimming

Passion for cooking & sailing
