PROFILE

Data Scientist & AI Engineer bridging business strategy and cutting-edge AI. Five years at Otto Group built deep expertise in corporate data flows, financial systems, and cross-functional stakeholder communication. Now orchestrating end-to-end AI solutions across multiple layers — from multi-agent LLM systems and automated news-crawler pipelines to deep learning models for computer vision, deployed on modern cloud infrastructure (AWS CDK). Equally comfortable with AI-assisted rapid prototyping using the latest tools and navigating legacy enterprise systems. Pursuing an M.Sc. in Data Science & AI at FH Wedel while actively shipping production code.

EXPERIENCE

AI & Data Science Working Student

Jun 2025 — Dec 2025

Datalogue · Hamburg

20h/week on a B2B Sales Lead project from concept to MVP — reduced manual sales research workload by 53%.

- Co-designed the system architecture combining a multi-agent app with a generic news-crawler pipeline for company & contact research; defined data flow, validation points, and human-in-the-loop feedback loops
- Built a Streamlit MVP running multi-LLM agents for company targeting, contact discovery, insight generation, and automated outreach email drafting with domain/contact verification
- Implemented a generic crawler pipeline to automatically crawl news sites, extract content, and analyze articles with LLMs to surface actionable company insights
