## PROFILE

Data Scientist and AI Engineer working at the intersection of business and modern AI. Over five years at OTTO Group built deep fluency in corporate data flows, financial systems, and cross-functional stakeholder work. Today I orchestrate end-to-end AI solutions across multiple layers — from multi-agent LLM systems and automated news-crawler pipelines to deep-learning models for computer vision. I built and deploy this portfolio on AWS CDK. Comfortable navigating modern AI-assisted development with the latest tools and the legacy enterprise systems many companies still run on. Currently writing my Master's thesis on GraphRAG Document Intelligence as part of my M.Sc. Data Science & AI at FH Wedel, while shipping production code on the side.

## EXPERIENCE

### AI & Data Science Working Student
2025-06 — 2025-12
Datalogue · Hamburg

20h/week on a B2B Sales Lead project from concept to MVP — reduced manual sales research workload by ~53%.

- Designed multi-agent architecture: LLM agents for company targeting, contact discovery, insight generation, and outreach drafting with human-in-the-loop feedback
- Built generic news-crawler pipeline with PostgreSQL 3NF + vector search; reduced sequential latency ~70× via async fan-out

### Junior Entrepreneur / Mentee
2024-11 — 2025-01
Future Founder Program · Hamburg

- Entrepreneurial program with workshops, coaching sessions, and pitch events to develop a startup mindset
- Built an AI-powered regulatory compliance tool for biotech within a team of four, streamlining processes to accelerate life-saving products to market

### Trainee Full Stack Java Development
2024-01 — 2024-04
neuefische GmbH · Hamburg

- Intensive full-stack bootcamp: Java (Spring Boot, OOP, MongoDB, OAuth, Docker), TypeScript, and advanced React
- Built and deployed MyRecipes — an AI-powered web app suggesting recipes from available ingredients using Java, REST APIs, MongoDB, and TDD

### Trainee Data Science & AI
2022-11 — 2023-02
neuefische GmbH · Hamburg

- Intensive data science bootcamp covering statistics, machine learning, data visualization, and big data analysis
- Capstone project: multi-objective recommender system using Python, SQL, GCP, Word2Vec, and Co-Visitation Matrix

### Financial Accountant
2017-04 — 2022-07
OTTO Group · Hamburg

- Led robotics initiatives: automated booking of vacation accruals and interest schedules via UiPath, optimized booking processes and analytical workflows using Excel & SAP
- Independently managed financial accounting for multiple OTTO Group subsidiaries using SAP FI-CO
- Prepared monthly, quarterly & annual financial statements (HGB & IFRS); managed consolidation reporting in SAP BPC; main contact for external auditors

### Intern in Group Financial Reporting
2016-11 — 2017-04
OTTO Group · Hamburg

- Supported IFRS implementation, options evaluation & financial statement review; gained knowledge of group consolidation working with consulting firms

## EDUCATION

**M.Sc. Data Science & Artificial Intelligence** 2024-04 — Present
FH Wedel, Wedel, Germany

- Thesis in progress: Document Intelligence and Knowledge Graph Construction — OCR-free extraction with Donut and LayoutLMv3, knowledge graph construction, GraphRAG reasoning with local LLMs, zero cloud dependency
- Deep Learning project: Urban Farming Plant Health — hierarchical 3-stage pipeline across ViT/CNN architectures with Grad-CAM and Attention Rollout explainability
- Coursework: Deep Learning, Computer Vision, Machine Learning, Symbolic AI, Econometrics, Empirical Research Methods, Category Management, E-Commerce Business Models, Digital Transformation, Strategic Management, Agile PM & Change Management, Data Engineering, Unix & Shell Programming

**Professional Course Financial Accounting (Bilanzbuchhalter)** 2018 — 2020
GFS Steuerfachschule

**B.Sc. Business Administration, Financial Management & Banking** 2009 — 2013
Yarmouk Private University, Damascus, Syria

- Thesis: Testing the Capital Asset Pricing Model (CAPM) in the Syrian Stock Market

## TECHNICAL SKILLS

### Programming Languages

Python | TypeScript | JavaScript | Java | SQL | VBA | HTML | CSS

### AI / Machine Learning

LLM Agents | Multi-Agent Orchestration | RAG | Prompt Engineering | Context Engineering | Function Calling | Structured Outputs | Local Inference (llama.cpp) | LLM APIs | Vision Transformers | CNNs | YOLO | Grad-CAM | Attention Rollout | Word2Vec | Embeddings | XGBoost / LightGBM | EDA | Regression | Time Series | Statistical Modeling

### Frameworks & Libraries

PyTorch | TensorFlow | Hugging Face | timm | scikit-learn | OpenCV | LangChain | Agno | AutoGen | Next.js | React | FastAPI | Streamlit | Spring Boot | Pydantic | SQLAlchemy | BeautifulSoup | Tailwind CSS | MDX | Pandas | Polars | NumPy | Plotly | Matplotlib | Seaborn

### Cloud & DevOps

AWS (CDK, Lambda, S3, CloudFront) | GCP | Docker | GitHub Actions | Render | MLflow | Makefile | Playwright

### Databases

PostgreSQL (3NF) | MongoDB | Vector DB (FAISS, Pinecone) | SAP FI-CO / BPC

### Tools

Git | Jupyter | UiPath (RPA) | Oxylabs | Sanity CMS | Stripe

## KEY STRENGTHS

- Translates business problems into AI-powered products
- Strategic, entrepreneurial, creative - innovation driven
- Bridges AI, business logic, and infrastructure
- Rapid AI-assisted development with the latest tools
- Strong business understanding
- End-to-end ownership- ideation & product management
- Fluent in both modern AI and legacy enterprise systems
- Communicative, collaborative, & calm under pressure

## LANGUAGES

**German** C2 · **English** Full professional · **Arabic** Native · **Spanish** toward B1 · **French** Elementary

## HOBBIES & INTERESTS

**Music Lover:**
Guitar | Dabbles in piano when life allows

**Pushing Limits:**
Marathon runner | Bouldering | Swimming

**Passion for cooking & sailing**
