TECHNICAL SKILLS

Programming Languages

Python · TypeScript · JavaScript · Java · SQL · VBA · HTML · CSS

AI / Machine Learning

LLM Agents · Multi-Agent Orchestration · RAG · Prompt Engineering · Context Engineering · Function Calling · Structured Outputs · Local Inference (llama.cpp) · LLM APIs · Vision Transformers · CNNs · YOLO · Grad-CAM · Attention Rollout · Word2Vec · Embeddings · XGBoost / LightGBM · EDA · Regression · Time Series · Statistical Modeling

Frameworks & Libraries

PyTorch · TensorFlow · Hugging Face · timm · scikit-learn · OpenCV · LangChain · Agno · AutoGen · Next.js · React · FastAPI · Streamlit · Spring Boot · Pydantic · SQLAlchemy · BeautifulSoup · Tailwind CSS · MDX · Pandas · Polars · NumPy · Plotly · Matplotlib · Seaborn

Cloud & DevOps

AWS (CDK, Lambda, S3, CloudFront) · GCP · Docker · GitHub Actions · Render · MLflow · Makefile · Playwright

PROFILE

Data Scientist and AI Engineer working at the intersection of business and modern AI. Over five years at OTTO Group built deep fluency in corporate data flows, financial systems, and cross-functional stakeholder work. Today I orchestrate end-to-end AI solutions across multiple layers — from multi-agent LLM systems and automated news-crawler pipelines to deep-learning models for computer vision. I built and deploy this portfolio on AWS CDK. Comfortable navigating modern AI-assisted development with the latest tools and the legacy enterprise systems many companies still run on. Currently writing my Master's thesis on GraphRAG Document Intelligence as part of my M.Sc. Data Science & AI at FH Wedel, while shipping production code on the side.

EXPERIENCE

AI & Data Science Working Student
2025-06 — 2025-12

Datalogue · Hamburg

20h/week on a B2B Sales Lead project from concept to MVP — reduced manual sales research workload by ~53%.

- Designed multi-agent architecture: LLM agents for company targeting, contact discovery, insight generation, and outreach drafting with human-in-the-loop feedback
- Built generic news-crawler pipeline with PostgreSQL 3NF + vector search; reduced sequential latency ~70× via async fan-out

Junior Entrepreneur / Mentee
2024-11 — 2025-01

Future Founder Program · Hamburg

- Entrepreneurial program with workshops, coaching sessions, and pitch events to develop a startup mindset
- Built an AI-powered regulatory compliance tool for biotech within a team of four, streamlining processes to accelerate life-saving products to market

Trainee Full Stack Java Development
2024-01 — 2024-04

neuefische GmbH · Hamburg

- Intensive full-stack bootcamp: Java (Spring Boot, OOP, MongoDB, OAuth, Docker), TypeScript, and advanced React
- Built and deployed MyRecipes — an AI-powered web app suggesting recipes from available ingredients using Java, REST APIs, MongoDB, and TDD

Trainee Data Science & AI
2022-11 — 2023-02

neuefische GmbH · Hamburg

- Intensive data science bootcamp covering statistics, machine learning, data visualization, and big data analysis
- Capstone project: multi-objective recommender system using Python, SQL, GCP, Word2Vec, and Co-Visitation Matrix

Financial Accountant
2017-04 — 2022-07

OTTO Group · Hamburg

- Led robotics initiatives: automated booking of vacation accruals and interest schedules via UiPath, optimized booking processes and analytical workflows using Excel & SAP
- Independently managed financial accounting for multiple OTTO Group subsidiaries using SAP FI-CO
- Prepared monthly, quarterly & annual financial statements (HGB & IFRS); managed consolidation reporting in SAP BPC; main contact for external auditors

Intern in Group Financial Reporting
2016-11 — 2017-04

OTTO Group · Hamburg

- Supported IFRS implementation, options evaluation & financial statement review; gained knowledge of group consolidation working with consulting firms

Databases

PostgreSQL (3NF) | MongoDB | Vector DB (FAISS, Pinecone) | SAP FI-CO / BPC

Tools

Git | Jupyter | UiPath (RPA) | Oxylabs | Sanity CMS | Stripe

KEY STRENGTHS

- Translates business problems into AI-powered products
- Strong business understanding
- Strategic, entrepreneurial, creative - innovation driven
- End-to-end ownership- ideation & product management
- Bridges AI, business logic, and infrastructure
- Fluent in both modern AI and legacy enterprise systems
- Rapid AI-assisted development with the latest tools
- Communicative, collaborative, & calm under pressure

LANGUAGES

German C2
English Full professional
Arabic Native
Spanish toward B1
French Elementary

HOBBIES & INTERESTS

Music Lover
Guitar
Dabbles in piano when life allows

Pushing Limits
Marathon runner
Bouldering
Swimming

Passion for cooking & sailing

REFERENCES

Available upon request

Thank you for taking the time to explore my profile. As I bring high-impact experience across the full AI stack, I stay genuinely driven to go deeper, adopt what's new, and grow with every challenge I take on. I look forward to discussing how I can contribute to your team.

EDUCATION

M.Sc. Data Science & Artificial Intelligence 2024-04 — Present
FH Wedel, Wedel, Germany

- Thesis in progress: Document Intelligence and Knowledge Graph Construction — OCR-free extraction with Donut and LayoutLMv3, knowledge graph construction, GraphRAG reasoning with local LLMs, zero cloud dependency
- Deep Learning project: Urban Farming Plant Health — hierarchical 3-stage pipeline across ViT/CNN architectures with Grad-CAM and Attention Rollout explainability
- Coursework: Deep Learning, Computer Vision, Machine Learning, Symbolic AI, Econometrics, Empirical Research Methods, Category Management, E-Commerce Business Models, Digital Transformation, Strategic Management, Agile PM & Change Management, Data Engineering, Unix & Shell Programming

Professional Course Financial Accounting (Bilanzbuchhalter) 2018 — 2020
GFS Steuerfachschule

B.Sc. Business Administration, Financial Management & Banking 2009 — 2013
Yarmouk Private University, Damascus, Syria

- Thesis: Testing the Capital Asset Pricing Model (CAPM) in the Syrian Stock Market

SELECTED PROJECTS

Portfolio Website 2026
Personal

Full-stack portfolio with AI RAG chatbot, MDX blog, four locales incl. Arabic RTL, AWS CDK deployment. Lighthouse 90+, dual-pipeline CV PDF generator.

B2B Sales Lead Pipeline 2025
Datalogue

Multi-agent LLM system automating B2B sales research. Four agents (Targeting, Insights, Contact Discovery, Outreach) share state via a PostgreSQL 3NF schema; async fan-out cut latency ~10×. Reduced manual research workload by ~53%.

Urban Farming Plant Health 2025
M.Sc. Deep Learning · FH Wedel

Hierarchical 3-stage pipeline (PlantID → Health → Disease) across 8+ ViT/CNN architectures on 31k+ images — 99.9 / 99.7 / 99.1 % per stage. Key finding: significant train-deploy domain gap on whole-plant scenes. Grad-CAM + Attention Rollout dashboard.

Bankruptcy Early Warning 2025
M.Sc. Seminar · FH Wedel

Multi-horizon ML early-warning for corporate bankruptcy (1–5 years) on Polish Companies — 43k observations, 64 ratios, 4.84 % positive class. Consensus feature selection with EPV guardrails; AUC 0.80 → 0.86 via 5-fold stratified CV.

HafenHut 2025
E-Commerce

Full-stack e-commerce app with AI Q&A assistant grounded in product and store content. Next.js App Router, Stripe, Resend — production-ready.

Biotech Regulatory RAG 2024
Future Founder Program

RAG compliance tool for biotech teams. Semantic vector search, GPT-4 grounded Q&A with citations, interactive compliance questionnaire. Team of four.

OTTO Multi-Objective Recommender 2023
neuefische DS Capstone

E-commerce recommender for OTTO Kaggle — clicks, carts, orders jointly. Word2Vec embeddings + co-visitation matrices for session-based filtering; scaled on GCP with Polars/Parquet.
